

I tell my students how bad our environment right now. We need to protect our earth and make our beach clean again.

I encouraged everyone to do this more often. It will bring us a brighter future for all human being.

— Student feel touched, and they all start to like their new ecology teacher.

It is a wonderful day to take my students to a fabulous beach.

I tell my students where they need to clean it up, and I tell them how to clean the trash correctly.

After I teach my students how to clean up the trash, I decided

Let students clean up with me

Rubbish Competition!

Two people count as a group. Whoever pick up the most trash in a hour, as a reward of this competition, winner don't need to do any homework for next week.

One hour later, one group pick up more than 15 trashes.

Then, I said, "Within a hour, one group can find 15 trashes. I don't need to say more that how bad is our environment..."
